

4 simple steps to create a 912 Registry drive...

1. Designate a contact person. We need their email and cell.
2. Designate a specific location and time for the start,
 - a. A mapquest or google map link to that start,
 - b. Specific driving instructions for the complete route, (to pass out at the start)
 - c. Think about planned regrouping areas, gas stops, picture areas, lunch stops
3. You'll also need someone to lead, someone to sweep. Both should be designated ahead of time.
 - a. Determine what happens when a car breaks down.
 - b. What does the sweeper do.?
 - c. Does rain cancel the event?
 - d. Both you and the participants will need to know this ahead of time.
4. Then create a promo flyer with the important information on it. Do it in word and we can convert it to .pdf if you like. Send the .pdf to us (Paula or Mike) we can put it up on a website so everyone can easily download it.

What the 912 Registry will do is:

- ❖ Provide you with liability releases for all to sign. (Protects you and the club in case of problems).
- ❖ We'll also promote the event on all applicable channels:
 1. An email campaign(s) to all local Members with a downloadable .pdf of your flyer.
 2. Posting on the 912 Registry Calendar
 3. Inclusion in the E-Newsletter Calendar
 4. Inclusion in the Magazine Calendar (magazine deadlines apply)
 5. BBS postings (this you can do all by yourself)
 6. Flyer display in the 912 Registry Tent for upcoming events

Not interested in a drive?

How about breakfast, a tech session, museum tour, or any other idea you might like to do?

Just ask for details!
